

ROADMAP:

The screenshot displays the Jira Roadmap interface for a project named 'crude oil price prediction'. The browser address bar shows the URL: `pnt2022tmid46157.atlassian.net/jira/software/projects/COPP/boards/1/roadmap`. The Jira navigation bar at the top includes links for 'Your work', 'Projects', 'Filters', 'Dashboards', 'People', and 'Apps', along with a 'Create' button and a search field.

On the left sidebar, the 'PLANNING' section is active, showing options for 'Roadmap', 'Backlog', 'Board', and 'Reports'. Below this, the 'DEVELOPMENT' section includes 'Code', 'Project pages', 'Add shortcut', and 'Project settings'. A note at the bottom of the sidebar states: 'You're in a team managed project. Learn more.'

The main area is titled 'Roadmap' and features a search bar, a 'Status category' dropdown, and a 'View settings' link. The roadmap itself is a horizontal timeline spanning from November to December. It shows two sprints: 'COPP Sprint 2, COPP Sprint 3' (covering Nov 7-13) and 'COPP Sprint 4' (covering Nov 14-20). A task titled 'What needs to be done?' is positioned at the start of the timeline on Nov 7. The timeline grid shows dates for each week, with the current date (Nov 11) highlighted. At the bottom right of the roadmap, there are tabs for 'Today', 'Weeks', 'Months', and 'Quarters', with 'Weeks' currently selected.

The Windows taskbar at the bottom of the screen shows the search bar with the text 'Type here to search', several application icons (including Edge, File Explorer, and Jira), and the system clock displaying '01:54' and '09-11-2022'.
